Exasol ExaThon India 2026 Submission

App Name : Knode

Team Name : StackTrace

THE Problem

Small Businesses & Local Grocery Store Owners spend about 50% of their daily time **taking orders from customers** through **phone calls, voice messages or messy handwritten notes**

Our Solution

We developed **Kn**ode, aimed at simplifying the process of recieving & handling customer orders at high frequencies for small scale businesses & local grocery stores

Features

- Provides a merchant dashboard for shop owners to review orders, pending orders etc..
- Converts handwritten/voice messages from customers to a itemized bill “Ready-To-Pack” Bill
- Keeps track of sales history, customer preferences
- Provides Customers the facility to specify delivery timing, speed & location
- Provides Monthly report on Sales & Business Health to Shop Owner
- Requires no installation of any app on the Customer side
- Shopkeepers can forward a simple link to existing customers or groups, the customer just needs to open the link in a browser to place orders in any format such as handwritten or text etc...

Application Flow

Collect Customer Requirements

Location

Delivery Speed

Generates
“Ready To Pack”
Order Bill

Dashboard to Review Orders

Shopkeeper

Customer

Customers use a link given to them by shopkeeper in advance to place orders in browser

Handwritten Orders/Voice Recordings

Exasol

Store Order Data & Customer Preferences on Exasol Personal

Tech Stack

- Python
- Flask Framework (Backend, Routing)
- Exasol Personal DB (Storing Order History, Customer preferences)
- Gemini Developer API (**Vision Models**)
- Gemini Developer API (**Audio Models**)
- Bootstrap 5
- Javascript

Impacts

- Enables Shop Owners to focus on delivery & business related topics
- Save Time for both Shopkeeper & Customer when it comes to placing orders
- Builds a healthy Customer-Business Relationship
- Provides Reports to Shopowners owners to improve Sales & Business Health
- Enables local stores & small scale businesses to reach nearby customers digitally

Thank You
